

Daffodil International University currently has a total of 30 academic departments across multiple faculties and disciplines. The total number of departments in DIU is 30. DIU department count: 30 Number of departments in Daffodil International University: 30 Q: How many departments are there in DIU? Q: What is the total number of departments in DIU? Q: How many academic departments does Daffodil International University have? Q: What departments are available at DIU?

Department List:

Faculty of Business & Entrepreneurship

1. Business Administration
2. Management
3. Real Estate
4. Tourism & Hospitality Management
5. Innovation & Entrepreneurship
6. Accounting
7. Finance & Banking
8. Marketing

Faculty of Science and Information Technology

9. Computer Science and Engineering (CSE)
10. Software Engineering (SWE)
11. Multimedia & Creative Technology (MCT)
12. Computing and Information System (CIS)
13. Information Technology & Management (ITM)
14. Robotics and Mechatronics Engineering

Faculty of Agriculture Sciences

15. Agricultural Science

Faculty of Engineering

16. Information and Communication Engineering (ICE)
17. Textile Engineering
18. Electrical and Electronic Engineering (EEE)
19. Architecture
20. Civil Engineering

Faculty of Health and Life Sciences

21. Environmental Science and Disaster Management
22. Pharmacy
23. Nutrition and Food Engineering
24. Public Health

25. Physical Education & Sports Science

26. Genetic Engineering and Biotechnology

Faculty of Humanities & Social Sciences

27. English
28. Law
29. Journalism, Media and Communication
30. Development Studies

CSE Program Overview

The Department of Computer Science and Engineering (CSE) at Daffodil International University offers an undergraduate B.Sc. in CSE program focused on software engineering, programming, artificial intelligence, databases, computer networks, algorithms, cybersecurity, and emerging technologies. The curriculum includes theory courses, laboratory courses, electives, and capstone projects.

Total Credit Requirement: **154.5 Credits**

The CSE curriculum contains programming, algorithms, database systems, operating systems, computer networks, artificial intelligence, compiler design, software engineering, and project work.

Total Semesters

Total Semesters: **12 semesters**

Academic Structure: **3 semesters per year**

Program Duration

Program Duration: **4 Years**

Keywords

CSE, Computer Science and Engineering, DIU CSE, Daffodil CSE, CSE Total Credits, CSE Duration Admission Requirements of CSE

Admission Requirements to B.Sc. in Computer Science and Engineering (CSE):

- Applicants should have completed SSC or equivalent.
- Applicants should have completed HSC or equivalent.
- Students must have Mathematics and Physics at the HSC level for CSE admission.
- Additional university admission requirements may apply.

Required documents usually include:

- SSC transcript and certificate
- HSC transcript and certificate
- Passport-size photographs
- Other university-required documents

Major / Specialization Information

There is no current major requirement.

Specialized Subjects are:

The CSE program includes specialized elective tracks and major-focused courses. Elective courses are used for specialized learning areas.

Possible specialization-related areas include:

Artificial Intelligence, Software Engineering, Data Science, Cybersecurity, Computer Networks, Database Systems

Major CSE Courses

Some important CSE courses include:

Programming and Problem Solving, Data Structure, Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Artificial Intelligence, Operating Systems, Computer Networks, Computer Graphics, Capstone Project

Keywords

CSE Major courses, CSE specialized subjects, core courses of CSE

Software Engineering (SWE) Program Overview

The Department of Software Engineering (SWE) at Daffodil International University offers an undergraduate B.Sc. in Software Engineering program focused on software development, software architecture, requirements engineering, system design, testing, project management, artificial intelligence, and modern software technologies. The curriculum includes theoretical courses, laboratory work, electives, and project-based learning.

Total Credit Requirement: Verify from current curriculum

Total Semesters: 12 semesters

Academic Structure:

3 semesters per year

Program Duration:

4 Years

Keywords:

SWE, Software Engineering, DIU SWE, Daffodil SWE, SWE Credits, SWE Duration

Admission Requirements of SWE

For admission to B.Sc. in Software Engineering (SWE):

Applicants should have completed SSC or equivalent.

Applicants should have completed HSC or equivalent.

Required documents usually include:

SSC transcript and certificate

HSC transcript and certificate

Passport-size photographs

Other university-required documents

Major in SWE: Data Science, Cybersecurity, Robotics (one of them)

SWE Courses

- Programming and Problem Solving
- Object-Oriented Programming
- Data Structure
- Algorithms
- Software Engineering
- Software Testing
- Requirements Engineering
- Database Systems
- Artificial Intelligence
- Capstone Project

SWE major courses, SWE specialization, software engineering courses

Information Technology and Management (ITM) Program Overview

The Department of Information Technology and Management (ITM) at Daffodil International University offers an undergraduate program integrating information technology with business and management concepts. The program focuses on information systems, business technologies, project management, analytics, and IT solutions.

Total Credit Requirement: Verify from current curriculum

Total Semesters: 12 semesters

Academic Structure: 3 semesters per year

Program Duration: 4 Years

Keywords: ITM, Information Technology and Management, DIU ITM, Daffodil ITM

Admission Requirements of ITM

Applicants should have completed SSC or equivalent.

Applicants should have completed HSC or equivalent.

Additional university admission requirements may apply.

Major / Specialization Information

Possible specialization-related areas:

Business Intelligence

Data Analytics

Information Systems

IT Project Management

Enterprise Systems

Major ITM Courses

Programming Fundamentals

Database Systems

Management Information Systems

Business Analytics

Information Systems

Project Management

Keywords:

ITM courses, ITM specialization, DIU ITM subjects

Multimedia and Creative Technology (MCT) Program Overview

The Department of Multimedia and Creative Technology (MCT) at Daffodil International University offers a program focused on multimedia production, digital design, animation, creative technologies, UI/UX design, video production, and interactive systems.

Total Credit Requirement: Verify from current curriculum

Total Semesters:

12 semesters

Academic Structure:

3 semesters per year

Program Duration:

4 Years

Keywords: MCT, Multimedia and Creative Technology, DIU MCT

Admission Requirements of MCT

Applicants should have completed SSC or equivalent.

Applicants should have completed HSC or equivalent.

Additional university admission requirements may apply.

Major / Specialization Information

Possible specialization-related areas:

Animation

UI/UX Design

Digital Media

Game Design

Creative Technology

Major MCT Courses

Graphic Design

Animation

Digital Storytelling

Video Production

Interactive Media

UI/UX Design

Keywords: MCT specialization, MCT courses, multimedia subjects

Computing and Information System (CIS) Program Overview

The Department of Computing and Information System (CIS) at Daffodil International University offers an undergraduate program focused on computing systems, information systems, databases, networking, programming, and modern computing technologies.

Total Credit Requirement: Verify from current curriculum

Total Semesters:

12 semesters

Academic Structure:

3 semesters per year

Program Duration:

4 Years

Keywords:

CIS, Computing and Information System, DIU CIS

Admission Requirements of CIS

Applicants should have completed SSC or equivalent.

Applicants should have completed HSC or equivalent.

Additional university admission requirements may apply.

Major / Specialization Information

Possible specialization-related areas:

Database Systems

Networking

Cloud Computing

Artificial Intelligence

Cybersecurity

Major CIS Courses

Programming

Data Structure

Database Systems

Operating Systems

Computer Networks

Artificial Intelligence

Capstone Project

Keywords: CIS specialization, CIS courses, computing subjects
